EDUCATION

B.S. Information Systems and Technologies

International Technologies Institute, 2025

CERTIFICATIONS

CompTIA Pentest+

Cisco verified Ethical Hacker

PROJECTS

Butcher — Penetration Testing Project

Source: github.com/thedeepopc/butcher

Tools: Linux, bash, VBScript, bettercap, nikto, nmap, curl, wget, whatweb, wpscan, powershell

DeepSec — AI Autonomous Pentester

Source: github.com/thedeepopc/deepsec

Tools: Python, Bash, Linux, Networking, Web Security, LLM integration

EXPERIENCE

Company: Haad Tc

October 2024 — Present

Title: Penetration Tester / Cybersecurity Analyst

- Conducted 30+ **penetration tests** in isolated lab and corporate environments
- Performed Active Directory attacks and internal network exploitation with **80% domain compromise rate**
- Executed privilege escalation and lateral movement across **20+ networked systems**
- **Reduced vulnerabilities by 100% Critical, 90% High, and 76% Medium** through targeted remediation
- **Delivered 10+ technical reports and 5+ executive summaries with actionable recommendations**

Company: Independent Security Research

May 2025- Present

Title: Hands-on Penetration Testing & Offensive Security Experience

- Completed **50+ hands-on penetration testing labs** (Windows, Linux, Web Applications)
- Executed full attack chains from reconnaissance to post-exploitation in **35+ scenarios**
- Exploited **25+ CVEs** including authentication bypasses and service misconfigurations
- Performed Active Directory attacks: Kerberoasting, Pass-the-Hash, Golden Ticket
- Authored **20+ technical write-ups** with exploitation methodology and remediation strategies
- Developed custom exploitation scripts improving testing efficiency by **30%**

ADDITIONAL SKILLS AND TECHNOLOGIES

- **Infrastructure & AD Security:** Active Directory Attacks (DCSync, Kerberoasting), Internal Network Pivoting, Lateral Movement, Privilege Escalation (Windows/Linux).
- **Web Application Security:** OWASP Top 10, Authentication & Authorization Testing, Security Misconfiguration Analysis.
- **Offensive Operations:** Red Team Operations, Penetration Testing, Ethical Hacking, Detection Evasion, Post-Exploitation.

- **Vulnerability Management:** Vulnerability Assessment, CVE & CVSS Analysis, **Nessus , OpenVAS.**
- **Tools:** Burp Suite, Metasploit Framework, Nmap, OSINT Techniques.
- **Scripting & OS:** Python (Security Automation), Bash Scripting, Powershell Scripting, Kali Linux, Windows/Linux Security.
- **Reporting:** Technical Pentest Reporting, Proof-of-Concept (PoC) Development.
